SKILLS

Languages: C++, Python, HTML, Java, SQL, CSS
Tools/Platforms: Excel, Power BI, Scikit-Learn, TensorFlow, MySQL, Django
Soft Skills: Problem-Solving, Team Player, Critical Thinking, Adaptability, Communication

PROJECTS

ShopX – Full Stack Ecommerce Web Application | Django, DRF, HTML, CSS, JavaScript Feb' 26

- Developed a full-stack e-commerce platform using Django with customer and seller authentication, product listing, cart management, wish-list, and order processing functionalities.
- Implemented dynamic product browsing with category filters, live search, image galleries, quantity-based cart updates, wallet-based checkout, and simulated payment workflow to enable seamless end-to-end purchasing experience.
- Designed an interactive user interface with reusable templates, seller dashboard, order tracking, and profile management modules, delivering a scalable and production-style marketplace architecture.

Indian Lakes' Water Quality Analysis | Power BI, Python | Power BI Dec' 25

- Developed interactive Power BI dashboards analysing Indian lake water quality data (2017–2022) from CPCB NWMP, integrating six annual datasets into a unified model.
- Performed data preprocessing and feature engineering using Power Query, creating Water Quality Index (WQI), Oxygen Sufficiency, and Environmental Risk metrics.
- Implemented pollution source classification (Sewage, Agriculture, Industrial, Urban) and built state-wise comparisons, trend analysis, and priority rankings.
- Integrated Python in Power BI to generate correlation heatmaps, validating pollutant relationships and strengthening analytical insights.

Neuro Vision | Python, CGAN, HTML, CSS Apr' 25

- Led a 3-member team to develop NeuroVision, an initiative to reduce CT scan cost and radiation exposure by generating CT-equivalent images from MRI scans using a Pix2Pix Conditional GAN architecture.
- Engineered CGAN pipeline with extensive MRI–CT paired data preprocessing, achieving 85–90% structural accuracy, enabling reliable CT reconstruction in low-resource and remote settings.
- Deployed the end-to-end model as a web-based application (HTML frontend), ensuring fast inference and accessibility, and coordinated the full project lifecycle from model design to user-ready interface.

TRAINING

CSE Pathshala Jun' 25 – Jul' 25

Advanced Python for ML & AI

- Performed EDA using NumPy, Pandas, Seaborn leading to a 20% reduction in preprocessing time.
- Developed, trained, and evaluated various Machine Learning models, including Linear Regression, KNN, SVM, Decision Trees, K-Means, and Ensemble Methods using Scikit-learn, achieving an accuracy improvement of 15%.
- Employed feature engineering techniques to enhance model performance by 25% for predictive analysis.

CERTIFICATES

Data Structures and Algorithms | *imneo* Dec' 24

Cloud Computing | *NPTEL* | [Link](#) Apr' 24

Machine Learning with Python | YHills (E-cell IIT Hyderabad) | [Link](#) Aug' 23

EDUCATION

Lovely Professional University Phagwara, Punjab
Bachelor of Technology Aug' 23 – Present
Computer Science and Engineering | CGPA: 9.05

Explore International School Singur, West Bengal
Intermediate Mar' 22 – May' 23
PCM | Percentage: 69.6%

St. Helen's School Howrah, West Bengal
Matriculation Mar' 20 – May' 21
Percentage: 87.4%
